

Test case title: Login happy path

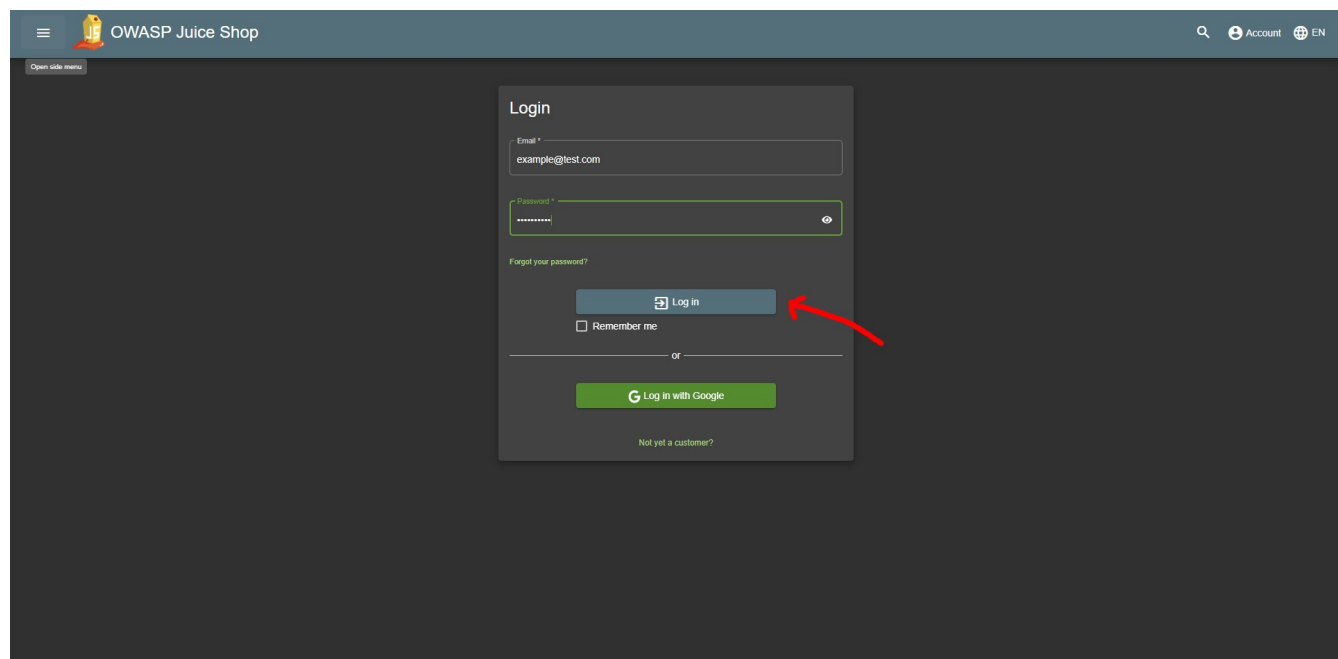

Test case id: TC07

Description: Test case to validate the happy path for an user trying to log into the application, using a valid email and password combination.

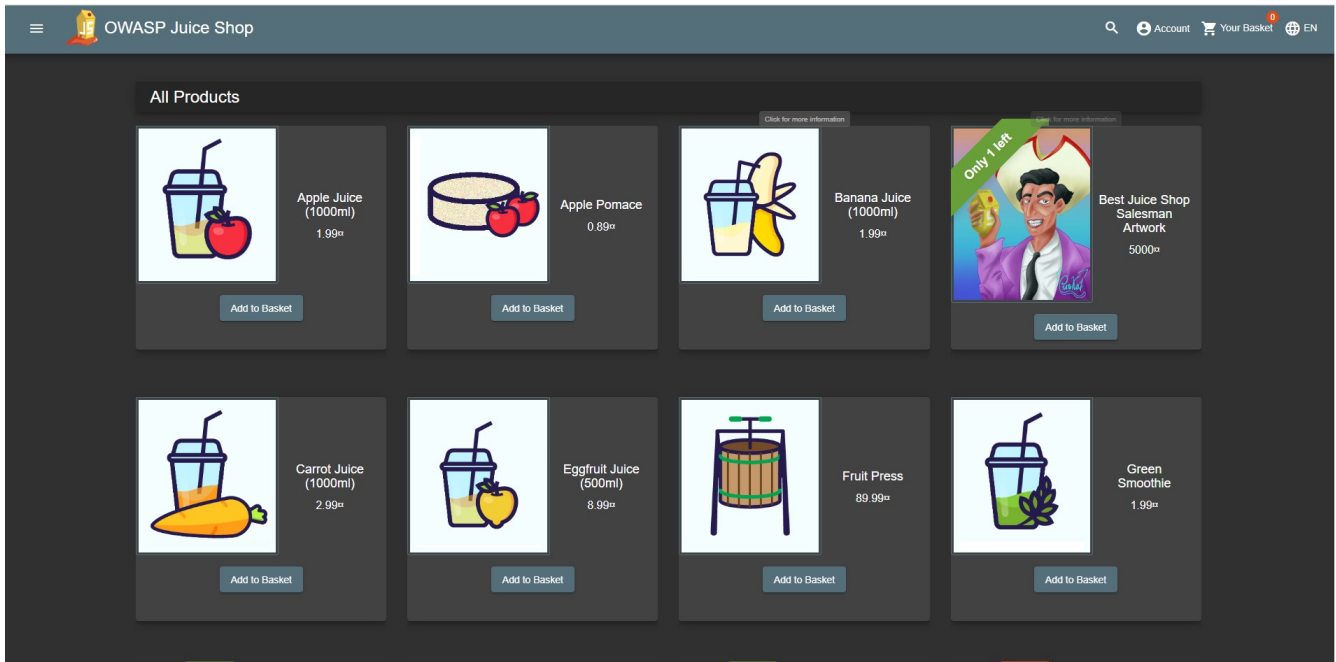

Steps	Expected result
Navigate to Login page: https://juice-shop.herokuapp.com/#/login	User should be able to access app's login page.
In the email field, type a valid email address for an already existent user	User should be able to locate and type into the email field.
In the password field, type the password for the user	User should be able to locate and type into the password field.
Locate the button with the text "Log in" and click it.	User should be able to locate and interact with the submit button.

Final expected result: After using a correct email/password combination when trying to log in, and clicking the "Log in" button, the app should redirect the user into the home page (<https://juice-shop.herokuapp.com/#/search>), and the button "Your Basket" should be present at the top right corner.

Examples:

Entering valid email/password combination and clicking "Log in"

Home page after successful login
