

**Test case title:** Login using non-existent email (API)

**Test case id:** TC19

**Description:** Test case to verify when an user tries to login to the app using a non-existent email.

<b><u>Steps</u></b>	<b><u>Expected result</u></b>
<i>Send a POST request to the endpoint and using the payload specified below.</i>	User should be able to send a POST request to the endpoint, and using the predefined payload.
Verify the response of the request.	Request should return a negative response.

**Final expected result:** Request response should be code 401 Unauthorized since user's email doesn't exist. Request should include a message saying "Invalid email or password."

**Data:**

**Endpoint:** <https://juice-shop.herokuapp.com/rest/user/login>

**Payload:**

```
{  
  "email": "justatest@testest.net",  
  "password": "123123"  
}
```
