

**Test case title:** Register using invalid security question answer (API)

**Test case id:** TC15

**Description:** Test case to validate an user trying to register in the application using an invalid answer for the security question.

<b><u>Steps</u></b>	<b><u>Expected result</u></b>
<i>Send a POST request to the endpoint and using the payload specified below.</i>	User should be able to send a POST request to the endpoint, and using the predefined payload.
Verify the response of the request.	Request should return a negative response.

**Final expected result:** Request should return a negative response, indicating there's a problem with the data provided in the payload (in this case, the answer field for the security question is blank)

**Data:**

**Endpoint:** <https://juice-shop.herokuapp.com/api/Users/>

**Payload:**

```
{
  "email": "test123@example.uy",
  "password": "123123",
  "passwordRepeat": "123123",
  "securityQuestion": {
    "id": 1,
    "question": "Your eldest siblings middle name?",
    "createdAt": "2023-07-19T16:46:36.489Z",
    "updatedAt": "2023-07-19T16:46:36.489Z"
  },
  "securityAnswer": ""
}
```
