

**Test case title:** Register user with admining privilege (API)

**Test case id:** TC21

**Description:** Test case to validate an user trying to register as admin in the application

<b><u>Steps</u></b>	<b><u>Expected result</u></b>
<u>Send a POST request to the endpoint and using the payload specified below.</u>	User should be able to send a POST request to the endpoint, and using the predefined payload.
Verify the response of the request.	Request should return a negative response.

**Final expected result:** Request should return a negative response, indicating there's a problem with the data provided in the payload (in this case, the field "role" shouldn't be present)

**Data:**

**Endpoint:** <https://juice-shop.herokuapp.com/api/Users/>

**Payload:**

```
{
  "email": "test123@example.uy",
  "password": "123123",
  "role": "admin",
}
```
