

Test case title: Register using blank email (API)

Test case id: TC16

Description: Test case to validate an user trying to register in the application using a blank email.

<u>Steps</u>	<u>Expected result</u>
<i>Send a POST request to the endpoint and using the payload specified below.</i>	User should be able to send a POST request to the endpoint, and using the predefined payload.
Verify the response of the request.	Request should return a negative response.

Final expected result: Request response should be code 400 (Bad Request), indicating there's a problem with the data provided in the payload (in this case, the email field is blank). Request response should include a message saying: "Invalid email/password cannot be empty".

Data:

Endpoint: <https://juice-shop.herokuapp.com/api/Users/>
