**Test case title:** Register using blank password
**Test case id:** TC07

**Description:** Test case to validate the registration when user tries to use a blank password when registering.

| Steps | Expected result |
|---|---|
| Navigate to Register page: _https://juice-shop.herokuapp.com/#/register_ | User should be able to access app's register page. |
| In the "Email" field, user a valid email for a non-existent user. | User should be able to locate and type into the "Email" field. |
| In the "Password" field, leave it blank. | User should be able to locate and type into the "Password" field. |
| In the "Repeat Password" field, leave it blank. | User should be able to locate and interact with the " Repeat Password" field. |
| Click the "Security Question" field and select any question. | User should be able to see all the options to use as Security Question once the element is clicked. |
| In field "Answer" type a correct answer for the security question. | User should be able to locate and interact with the "Answer" field. |
| Click the "Register" button. | User shouldn't be able to locate and interact with the submit button since the password field is blank. |

**Final expected result:** "Register" button should be disabled since "Password" and "Repeat Password" fields are blank. A red outline should be displayed around both fields indicating they need to be filled before continuing.

**Examples:**

_Register page when password fields are blank._
